## WE CAN HANDLE YOUR COMPLETE REPAIR NEEDS

Process Pumps

Vertical & Horizontal Pumps

Displacement Pumps

Vacuum Pumps & Blowers

HMIs & Electronic Controls

**Process Pump Repair** – We have several facilities available to service and repair your pump and related equipment. Our repair operations are fully equipped with machinery capable of handling every step of the process, including: Complete Refurbish and Reconditioning, Machining & Welding, Dynamic Balancing, Fabrication & Assembly, Pump and Motor Alignment, Part Reproduction for Damaged or Obsolete Part Replacement

**Electronic Repair** – SunSource has the expertise and equipment to clean, check and dynamically test your industrial component, to replicate its malfunction, and the skilled technicians to fix it. Once the unit is approved for completion it is repaired and load tested on one of our custom built test stand to simulate your application under working conditions.
