HOSE & RUBBER COMPANY

Advantages:

- Cast Iron Impeller Housing and Impeller, 2-vane impeller design for wide solids passage.
- More HEAD than the competition, allows for greater pumping distance & pressure.
- A TRUE trash pump, passing half its port size in solids.
- Rugged 1" diameter steel powder-coated roll cage, most competitor use a 5/8" thin walled cage.
- 173 GPM, 25' of lift, 108' of total head.
- Honda GX160 engine.

RS TP2H

Advantages:

- Cast Iron Impeller, Volute & Wear Plate, easy to change.
- 6 point mounted vibrations isolators.
- A TRUE trash pump, passing half its port size in solids.
- Rugged 1" diameter steel powder-coated roll cage, most competitor use a 5/8" thin walled cage.
- 328 GPM, 25' of lift, 93' of total head.
- Honda GX240 engine.

RS TP3H

Advantages:

- Cast Iron Impeller, Impeller Housing & Wear Plate.
- Directional discharge fittings.
- A TRUE trash pump, passing half its port size in solids.
- Rugged 1.25" diameter steel powder-coated roll cage with 2 pneumatic wheels.
- 662 GPM, 25' of lift, 115' of total head.
- 16 HP Briggs & Stratton Vanguard engine.

HOSE & RUBBER COMPANY

Advantages:

- Light weight inexpensive transfer pump.
- Corrosion resistant thermoplastic material, ideal for saltwater and chemicals.
- Available with EPDM seals, BUNA-N and Viton seals are optional.
- 3.5 HP Briggs & Stratton engine.
- Large handle for easy carrying.
- RS AP22B delivers 140 GPM with 110' of head.

RS AP22B

Advantages:

- High pressure pump at half the cost of competitors in its class.
- Closed type aluminum impeller with stainless steel hub.
- Stainless steel wear ring for long lift.
- Exhaust priming system.
- 2nd to non in Marine construction
- 218 GPM @ 123 PSI
- Honda GX160 engine.

2 & 3 inch diaphragm Pumps

Advantages:

- High pressure pump at half the cost of competitors in its class.
- Closed type aluminum impeller with stainless steel hub.
- Stainless steel wear ring for long lift.
- Exhaust priming system.
- 2nd to non in Marine construction
- 218 GPM @ 123 PSI
